

OFYR WOOD STORAGE BLACK & WOOD STORAGE BLACK INSERTS

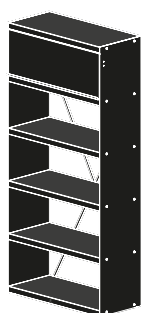

The Wood Storage Black transforms a stack of wood into an attractive feature wall. A hinged top shelf keeps tools and other items hidden away, and with two sizes available it's easy to find a solution for your space. Available in 216 cm by 100 cm or 200 cm.

The Wood Storage Inserts Black are designed to fit into the OFYR Wood Storage Black unit and are ideal for growing cooking herbs and add a splash of green to the wood pile. Made from steel with drilled drainage holes, they have a narrow 22,5 cm depth so logs can be stored behind.
